

welcome to LEET new novice! you have successfully gained your place among our troops, you should be aware that we hold you in great esteem, you have been thus assigned with your first mission.

Elements relevant to the mission:

year 2674, the world has suffered from endless natural catastrophes and earth is now almost completely uninhabitable.

The ZQH organisation is keeping a select few alive in artificial islands covered with an impenetrable glass bubble, survivors outside these walls suffer from disease, chaos and the rotten air.

— this situation lead to the creation of factions, coalitions meant for survival.

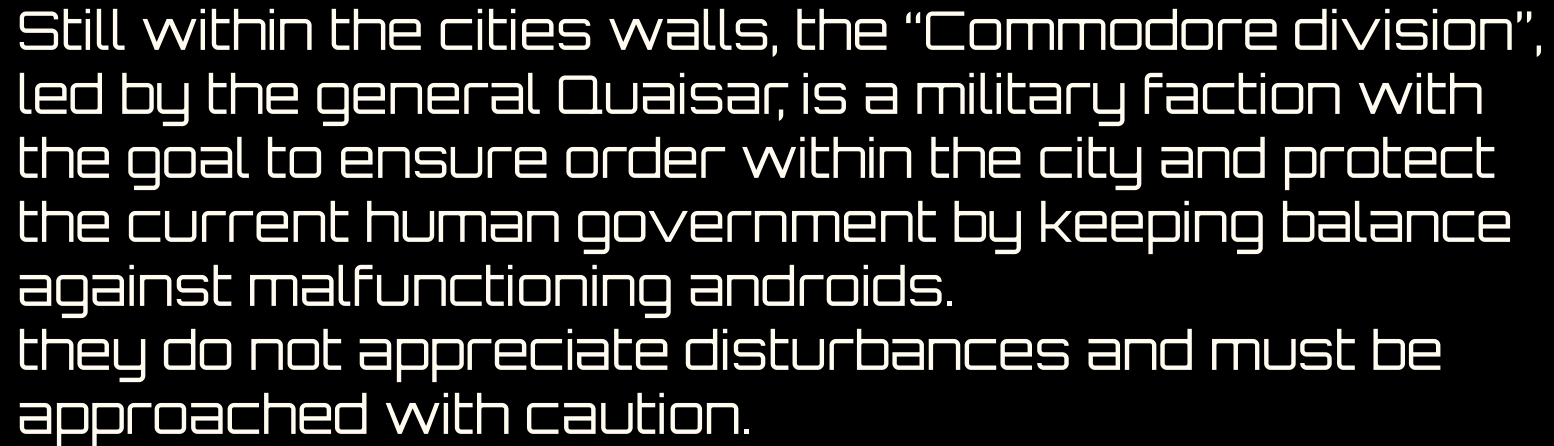

The first of these coalitions is “Order of the BIOS”, an alliance created by Cipher, a powerful AI with the goal of “patching” humanity, he is the leader of the army of androids taking care of the people inside the bubbles, any “defects” are thrown out of the safety of their walls, they aim to overtake all the habitable areas with every means.

— Our agents report on suspicious activities recently.

Still within the cities walls, the “Commodore division”, led by the general Quaisar, is a military faction with the goal to ensure order within the city and protect the current human government by keeping balance against malfunctioning androids. they do not appreciate disturbances and must be approached with caution.

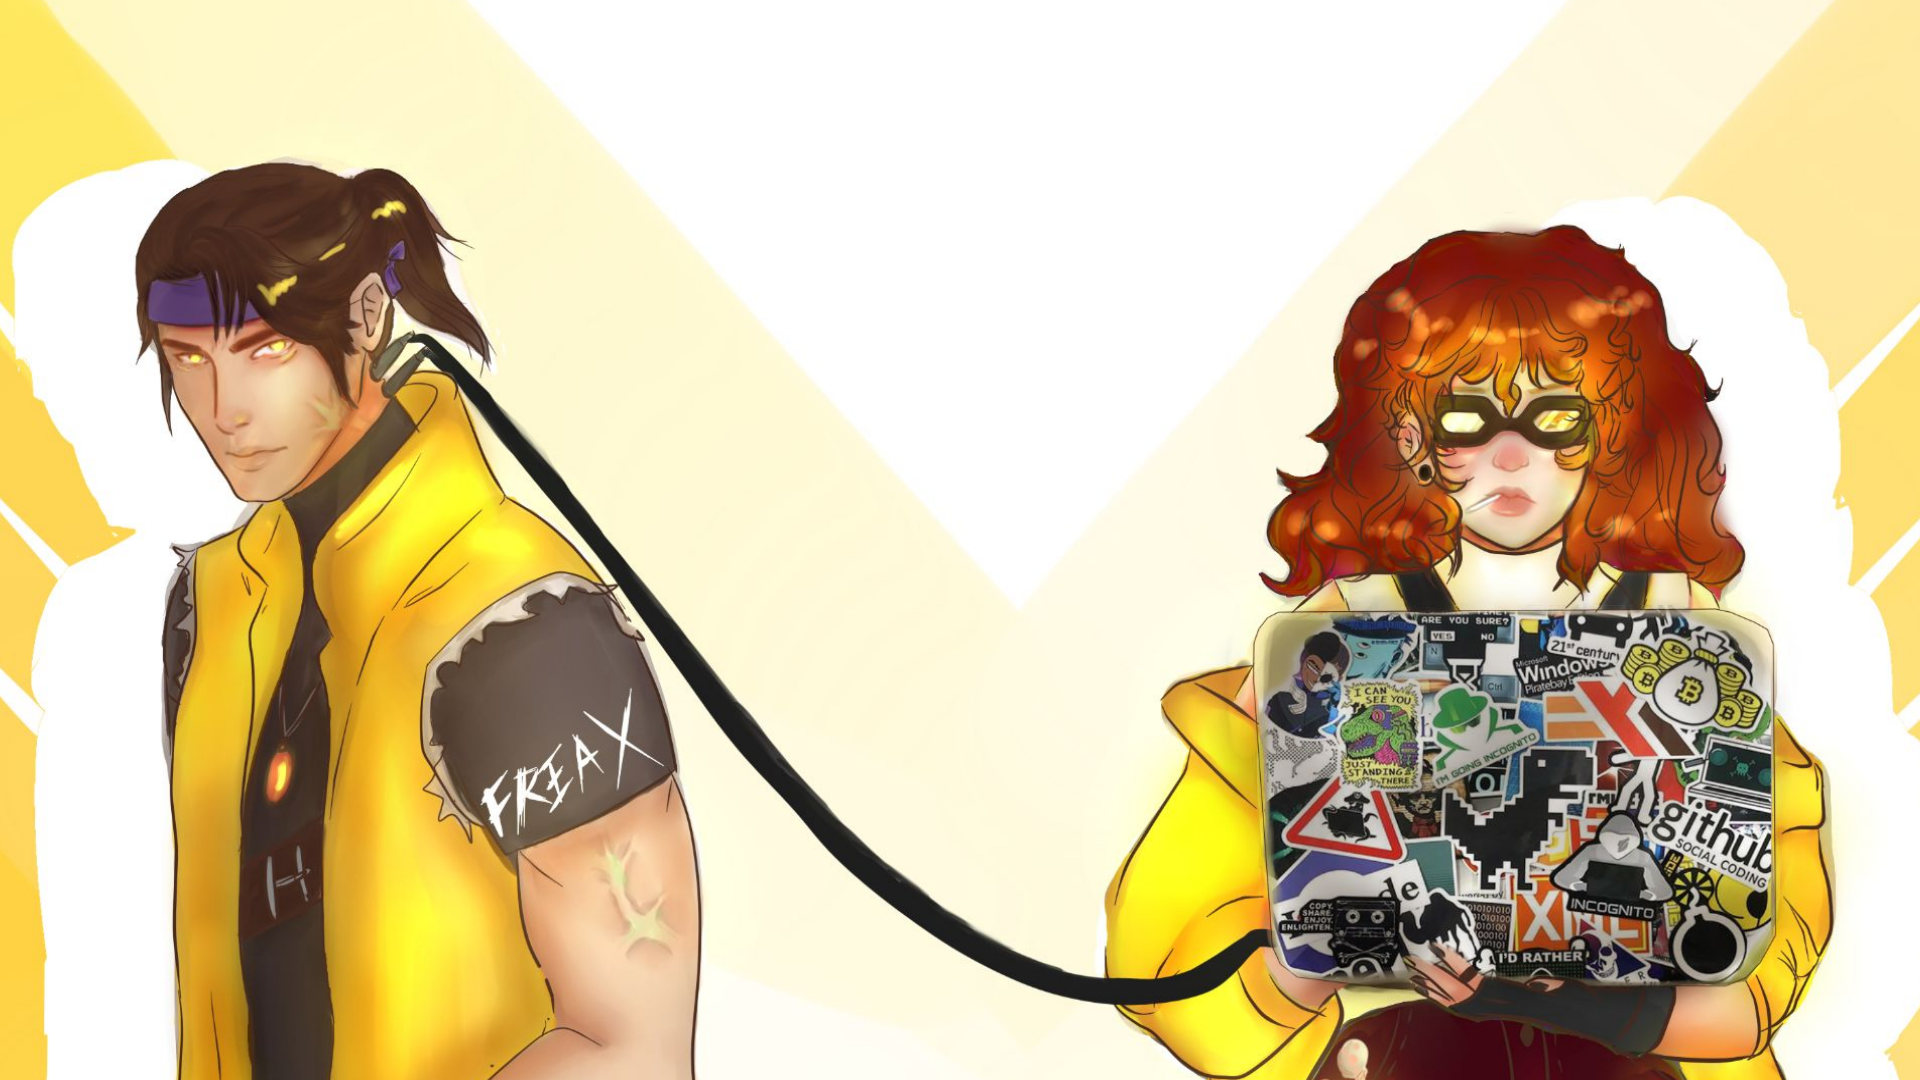

Dauntless and untamable, the “Pandora pact” mercenary coalition, led by Amal, a resilient cyborg, they govern the wasteland and are the last hope for any resistance against Cipher’s minions, they embrace cyber enhancements while keeping their human core, their goal is to ensure the survival of the “defects” and restitute life to a semblance of normalcy.

— they are very protective of one another and do not tolerate the invasion of their territories.

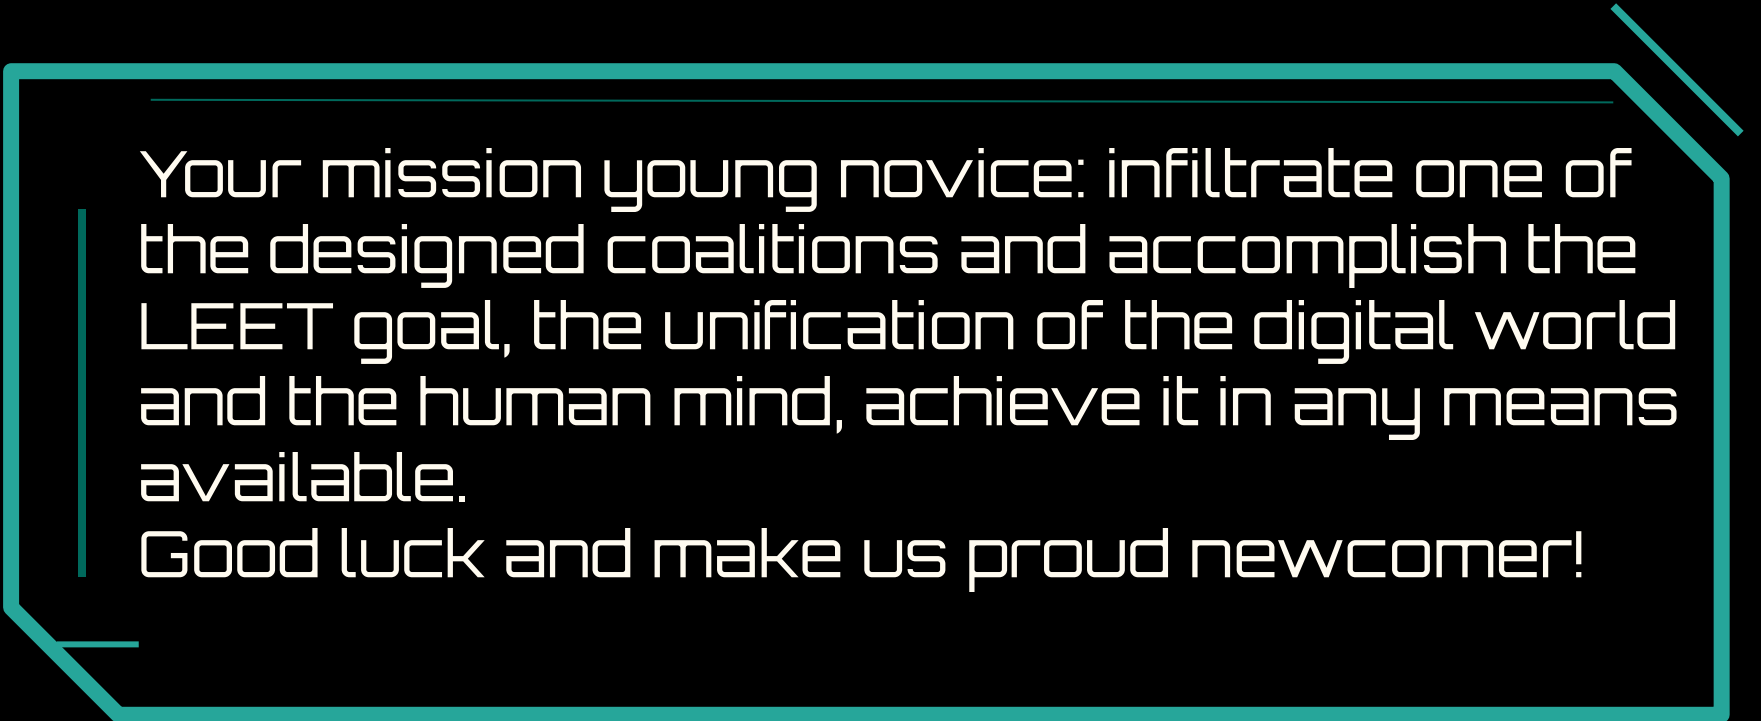

---

Finally the “Freax”, an underground rebellious group, they do not believe in hierarchy, their apparent lead is a woman known as “Ruby” and a defect called “Ryan”, not much is clear about them, they are a very secretive group and are only rarely seen hoarding resources and restoring defects, the only fact confirmed is that they aim to recover equality and to push humanity to

— cooperate, vigilance is a must when dealing with them as they are quite unpredictable.

---

Your mission young novice: infiltrate one of the designed coalitions and accomplish the LEET goal, the unification of the digital world and the human mind, achieve it in any means available.

Good luck and make us proud newcomer!
